- How the supreme court of the United States, or at least one member of it, views the present-day criticism of the courts is set forth in a speech by Justice Holmes, made public Saturday in the form of a senate public received by Justice Holmes, delivered the public set of the senate public senate public senate set of the senate public senate senate public senate sen document. Justice Holmes delivered the speech recently at a private dinner in New York. Science has taught the world skepticism, the judge said, by way of preface, and made it legiti-mate to put everything to the test of "Of course we are not excepted," he said, referring to the supreme court. "Not only are we told that when Marshall pronounced an act of congress unconstitutional he usurped a power that the constitution did not give, but we are told that we are the representatives of a class, the tool of the money power. I get letters, not always anonymous, intimating that we are corrupt. Well, gentlemen, I admit that it makes my heart ache. It is very painful when one spends all the energies of one's soul in trying to do good work with no thought but that of solving a problem according to the rules by which one is bound to know that many see sinister motives and would be glad of evidence that one was consciously bad. But we must take such things philosophically and try to see what we can learn from hatred and distrust, and whether behind them there may not be some germ of inarticulate truth." A very important truth to be extracted from the popular discontent, according to Justice Holmes, is that judges, partic ularly in state courts, have read their conscious or unconscious sympathies prematurely into the law. "It cannot to a large number of people, and these be helped, it is as it should be—that people are not going to stand for any the law is behind the times," declared Justice Holmes. "As law embodies eliefs that have triumphed in the battle of ideas and then have translat-ed themselves into action, while there still is doubt, while opposite convictions still keep a battle front against is not entitled to the field." > other like a safety pin. You can imagmile from the river. The rivers them-selves were like the rapids above Niagara and no boat could stay upright in it for a second. All six bridges over the Wabash were washed away and only one held on the Eel. Thursday morning about 2.30 we took No. 6 and really a peninsula between the rivers. Here we worked Thursday, at times almost the banks of the river itself. We could see houses, barns and chicken coops shooting down the river at the up against the piers of the bridges and could be seen in the river. No one has been able to get them off yet. Some are supposed to have been washed all the way down from Peru, fifteen miles north. But the most horrible of all was when a man's head was found between

> two iron spikes in the bridge. It is supposed that he was caught there by his neck and the current tore his body away. So far he has not been identified.
> There is one thing I saw that I will never forget. No. 6 was lashed to awning poles of Blick's saloon, a half a block from the river. How we got there I don't know, but it took us three hours to get back, the current was so strong. We had a little row-boat with us and we sent it down further to get an old

lady out of the Pennsylvania station. They got there and started back. They struck a submerged baggage truck and lost control of the boat. The current caught them and drove them against a guy wire of a telephone pole. The boat upset and was broken into bits against the pole. They weren't fifty yards from us but we were powerless to help them. I shall never forget that woman's screams. I have dreamed about it every night since. The two men shouted for help but soon the waves of the riv-er hushed their cries. We turned away and hid our faces; we couldn't bear to look. Then suddenly we heard a yell

about us on account of this than they ever thought about the Washington trip. It's been forgotten entirely.

— Camden Chronicle: The body of a foreigner was found last Monday about midday on the Kennedy plantation, hidden in a culvert under the roadway of the Seaboard Air Line. Examination showed that the man had two bullet holes in his body— one through the neck and another entering the arm. The section master and his crew working between Camden and Lugoff made the discovery— the man's feet protruding out of the culvert with his head wrapped in his coat. The body was carried to Lugoff where the coroner viewed the remains and it proved to be that of George Simons, one of two men claiming to be Syriar preachers who were seen at Camden earlier in the day soliciting aid for a church located somewhere in the old country. were taken up in the supreme court this morning and at 2 o'clock the state had practically finished its case. The main features of the long morning session were the score or more cit-izens of Columbia and Saluda, who swore that the reputation of B. B. Evans for honesty and fair dealing, was bad, and the testimony of two parties that Evans, while acting as their attorney, collected money for them, which he kept. The court room was crowded when the case was called this morning, and there were witness-es present from Columbia, Saluda and Edgefield. Chief Justice Gary retired from the bench when this case was reached and Mr. Sam J. Nichols of Spartanburg, sat as special associ ate justice in the case. As soon as the case was called, the attorneys for Evans moved to quash the proceed-ings on the ground that the complaint was not verified, that it was not brought through the resolution of a bar, and that it was not based on any indictment of a grand jury, that it was merely based on information and belief. Arguments on this point took up over an hour and the court retired for Charleston. Solicitor W. H. Cobb, who represented the state on the request of the attorney general, gave as his opinion that the habeas corpus writ was worthless; that when requisition was made on the governor of one state by the chief executive of another, no court, whether circuit or super until the governor of the state, to which the requisition was sent, had which the requisition was sent, had passed on the matter. George R. Rembert, of the defense, explained that the writ was obtained, not in a spirit of money, which he kept. He was also related to the prisoners out above of with having slandered certain charged with having slandered certain citizens of Saluda, namely, Sheriff B. F. Sample, Senator B. W. Crouch, and E. W. He referred to the fact that the indicti which had been returned against him in Saluda for forgery had been quashed. B. B. Evans denied any wrong-doing in the allegations made against him on the stand in his own behalf this afternoon before the supreme court. A score of witnesses swore to the good character of Mr. Evans. He was on the stand when ed for the night and the disbarment proceedings against him will be taken up again when the supreme court meets tomorrow morning.
